

Contract Collector™ for Windows®

***AutoPay* Module**

AutoPay generates preauthorized bank drafts from payer's bank accounts for loan payments. The payer signs a preauthorized recurring bank draft. Every month when the Payment is due, you print a bank draft check. This bank draft works like a check; only the payer does not have to sign it. All you have to do is print the bank draft and deposit it. The payment is automatically applied without any data entry and you don't hear the excuse, "The check is in the mail." It's not in the mail; it's in the bank!

Some banks charge \$1 or more per transaction for electronic banking. *AutoPay* can be a better alternative than electronic banking because you don't pay a fee per transaction. You can automate your payment collections and save hundreds of dollars a month over electronic banking.

Call our Product and Information department at **(888) 344-EDGE** or **(509) 852-8000** to get more information on the Contract Collector *AutoPay* Module.

* This option requires a laser printer with MICR toner cartridge.
